

How to use the 24onoff app

With the 24onoff app for iOS and Android you can log and view timesheets, and upload pictures on projects to keep track of progress.

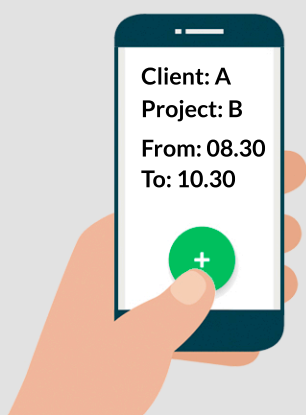

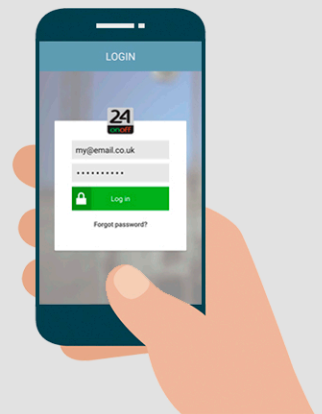

Here's how you get started:

Step 1 - Install the 24onoff app
Open Google Play or AppStore on your mobile and search for **24onoff**.

Step 2 - Log in

Open the app and enter your **email address** and **password** to log in. Your password was sent to your email when you were added to the company account.

Step 3 - Start logging

Either use the stopwatch to make the app remember and auto-fill your start- and stop time, or do it manually when the job is done. It's up to you!
